2022

ABOUT ME

I had a strong interest in electricity and electronics, a passion inherited from my father, who was one of the oldest electrical technicians before the Islamic Revolution and had a professional career in the elevator industry. I worked in this field for 4 years, progressing through various stages of growth and development. In 2007, I became the manager of Faraz Company for 8 years. During these 8 years, I gained comprehensive experience in standards, technical information, calculations, drafting, and more. I also began studying business management and obtained an MBA and a DBA degree. Additionally, during these 8 years, I thoroughly learned elevator drive settings, one of my interests, and I applied this knowledge in the company. In 2015, I started the company, Nikan, from a 58-square-meter store. Today, after 9 years, it has become one of the most reputable companies in the elevator industry, specializing in safety, sales of all elevator parts, and import and export. This achievement was made possible with the help of a group of elite and competent individuals. We are now the exclusive representatives of two major brands, METROPLAST and CENTA from Turkey, and we can supply all elevator parts in Iran. With God's help, we will continue to climb the steps of progress day by day.

WORK EXPERIENCE
